

SRIRAM K

AI & Data Science Graduate | Java Developer | Automation Testing Enthusiast

+91-6381-102-874 | wavene20@email.com | linkedin.com/in/sriram-k-486bb4343 | github.com/sriram-Kannan-45

PROFESSIONAL SUMMARY

Results-oriented AI and Data Science fresher with hands-on experience in deep learning, computer vision, and Java-based application development. Proficient in Core Java, OOP principles, REST API development, and Automation Testing using Selenium WebDriver with a focus on CI/CD-driven software delivery. Proven ability to design and deploy scalable AI solutions through internship and project experience. Seeking to contribute to Infosys engineering teams with a strong problem-solving mindset, Agile methodology, and a commitment to high-quality, testable software.

TECHNICAL SKILLS

Languages: Java, Python, C, SQL

Frameworks: TensorFlow, PyTorch, Scikit-learn

Libraries: NumPy, Pandas, OpenCV, NLTK, gTTS

Testing: Selenium WebDriver, Manual Testing, ISTQB Concepts

Tools: Git, GitHub, Jenkins, Maven, Docker

Concepts: OOP, Agile, SDLC, REST APIs, CI/CD

PROJECTS

Bone Fracture Detection System | Deep Learning · Computer Vision · YOLO github.com/sriram-Kannan-45

- Designed an AI-powered bone fracture detection system using YOLO for fast, high-precision analysis of X-ray and medical images.
- Implemented deep learning pipelines with TensorFlow and OpenCV, enabling real-time diagnostic inference with clinical-grade precision.
- Integrated image preprocessing and data augmentation to improve model generalization across diverse medical imaging datasets.
- Built a scalable, modular architecture suitable for clinical diagnostic deployment, significantly reducing manual analysis time.

Medicam — AI Medicine Recognition System | OpenCV · NLP · gTTS · Accessibility

- Developed an AI-based medicine recognition application using OpenCV for real-time image classification of medicines from camera input.
- Implemented multilingual Text-to-Speech (TTS) using gTTS, delivering usage instructions in Tamil and English to promote accessibility.
- Integrated NLTK-based NLP to parse and deliver structured medicine usage details, reducing misuse through guided auditory communication.
- Designed a user-first, audio-driven interface supporting users with low literacy or visual impairments through a minimal-click experience.

INTERNSHIP EXPERIENCE

Machine Learning Intern — TechVolt Pvt. Limited Jul 2024 – Oct 2024

- Executed end-to-end ML model development including data preprocessing, feature engineering, and algorithm implementation using Python and Scikit-learn.
- Applied regression and classification algorithms to solve real-world business problems with measurable accuracy benchmarks.
- Gained hands-on exposure to model evaluation, hyperparameter tuning, and performance optimization within an Agile team environment.

Deep Learning Intern — Evointoo Feb 2025 – Present

- Developing and fine-tuning deep neural network architectures using TensorFlow and PyTorch for image recognition and pattern classification.
- Implementing computer vision pipelines and contributing to model training, evaluation, and iterative performance analysis.

EDUCATION

B.Tech — Artificial Intelligence & Data Science 2022 – 2026

Knowledge Institution of Technology

HSC (Class XII) — 88.8% 2021 – 2022

Little Flower Higher Secondary School

SSLC (Class X) — 86.6% 2019 – 2020

Govt. High School, Chettichavadi

CERTIFICATIONS

- Machine Learning Certificate — TechVolt Pvt. Limited
- Deep Learning Certificate — Evointoo
- Java Programming Certificate — Stack Queue
